

Outlook Mobile Version Setup Guide

Prerequisite:

- Make sure you have setup your work email and MFA before proceeding
- Install “Outlook” app from <https://www.microsoft.com/en-gb/microsoft-365/outlook-mobile-for-android-and-ios>

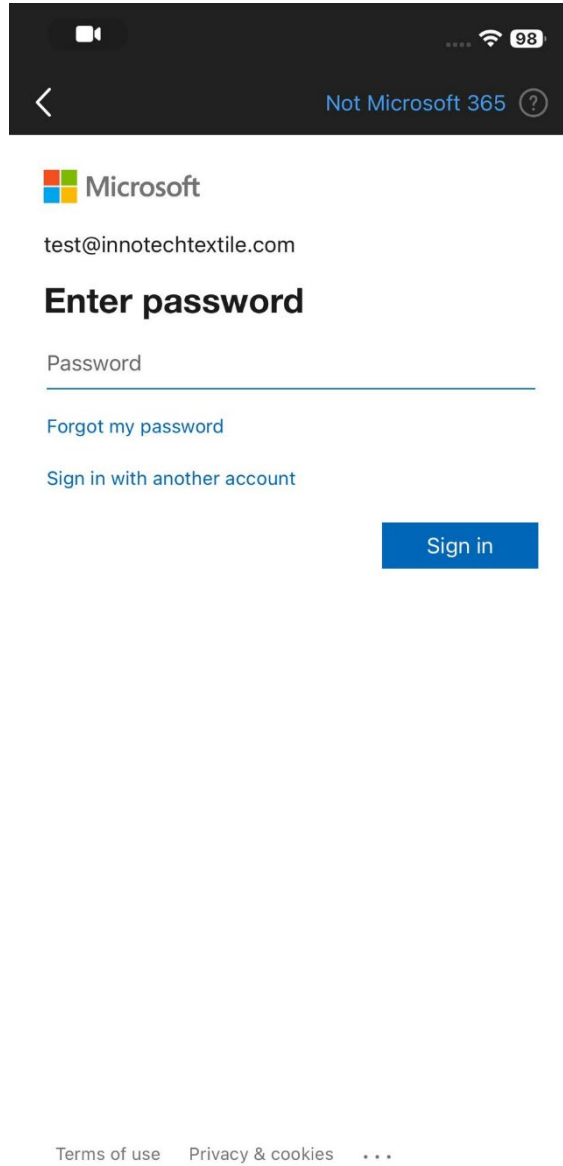

1. Open “Outlook” app.
2. Press “Add Account”

3. Enter your work email address

The screenshot shows a mobile application interface for adding an account. At the top, there's a status bar with a camera icon, signal strength, and a battery level of 99%. Below that is a navigation bar with a back arrow and the title 'Add Account'. The main content area has the instruction 'Enter your work or personal email' followed by a text input field labeled 'Email Address'. Below the input field are two buttons: 'Add Account' and 'Create New Account'. There is also a QR code icon with the text 'Sign in using the QR code on your computer' and a link for 'Privacy & Cookies'. At the bottom, there are three buttons for email domains: '@hotmail.com', '@gmail.com', and '@outlook.com'. A keyboard is visible at the very bottom of the screen.

4. Enter your password
