

Outlook – Adding a Shared Mailbox

Prerequisites: Go to <https://outlook.office.com> and log in to your work account.

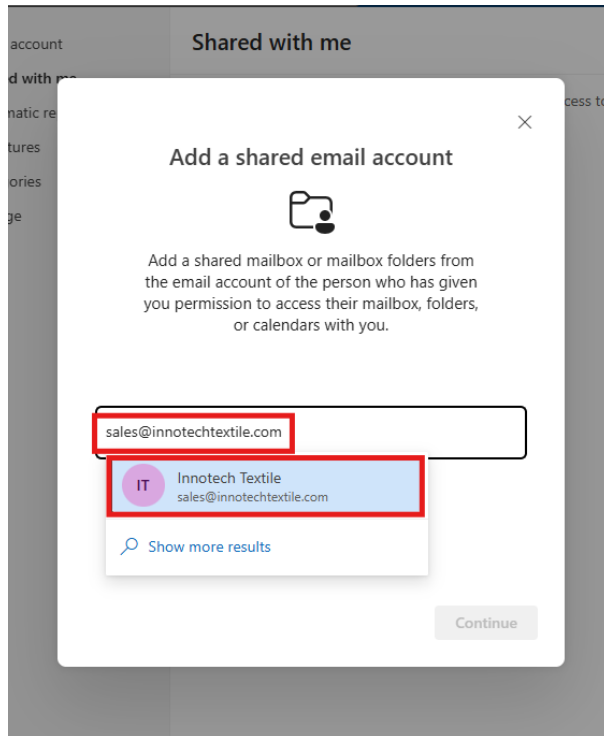

1. Right-click on your work email address.

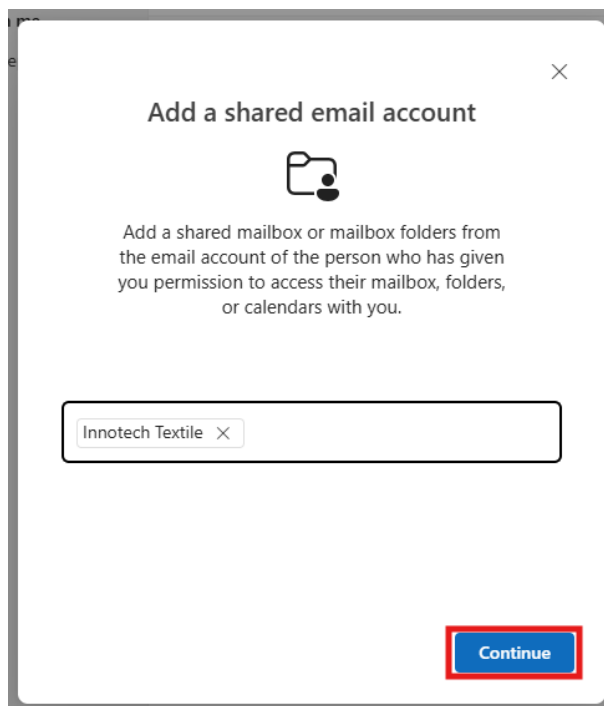

2. Click on “Add shared folder or mailbox”.

3. Enter the shared mailbox (example: sales@innotechtextile.com) you want to add and select the correct shared mailbox.

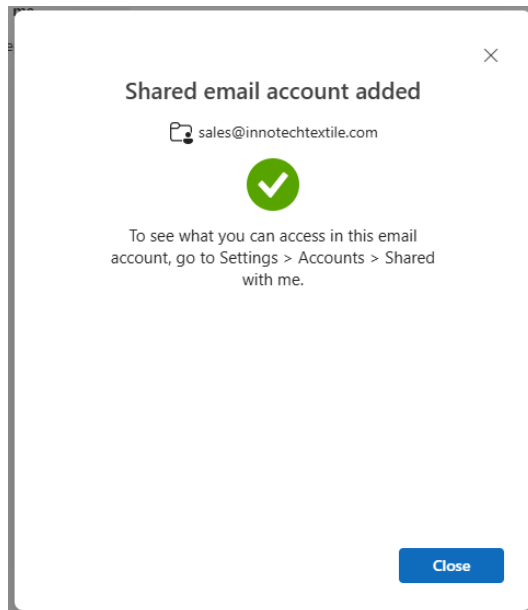

4. Proceed to "Continue".

5. You should see “Shared email account added”. Click “Close”.

If you are unable to find the shared mailbox or if it is showing an error adding the shared mailbox, please contact us.

6. Done. You should now see the shared mailbox below your work email address.

If you want to send an email using the shared mailbox you have added (Example: sales@innotechtextile.com). Please refer to “Outlook – Sending Email as Alias” guide.
