

Outlook – Sending Email as Alias

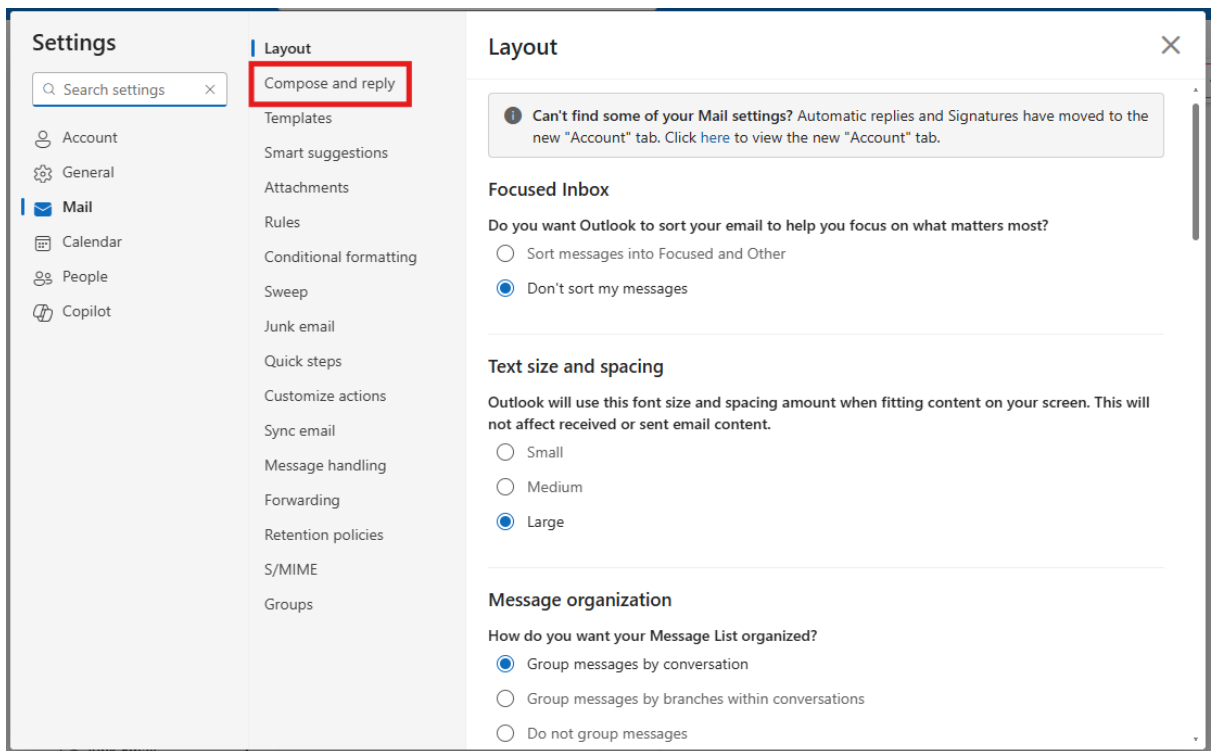

Prerequisites:

- Go to <https://outlook.office.com> and log in to your work account.
- You need to have a shared mailbox configured to use an email alias. Please refer to “Outlook - Adding a Shared Mailbox” to configure a shared mailbox.

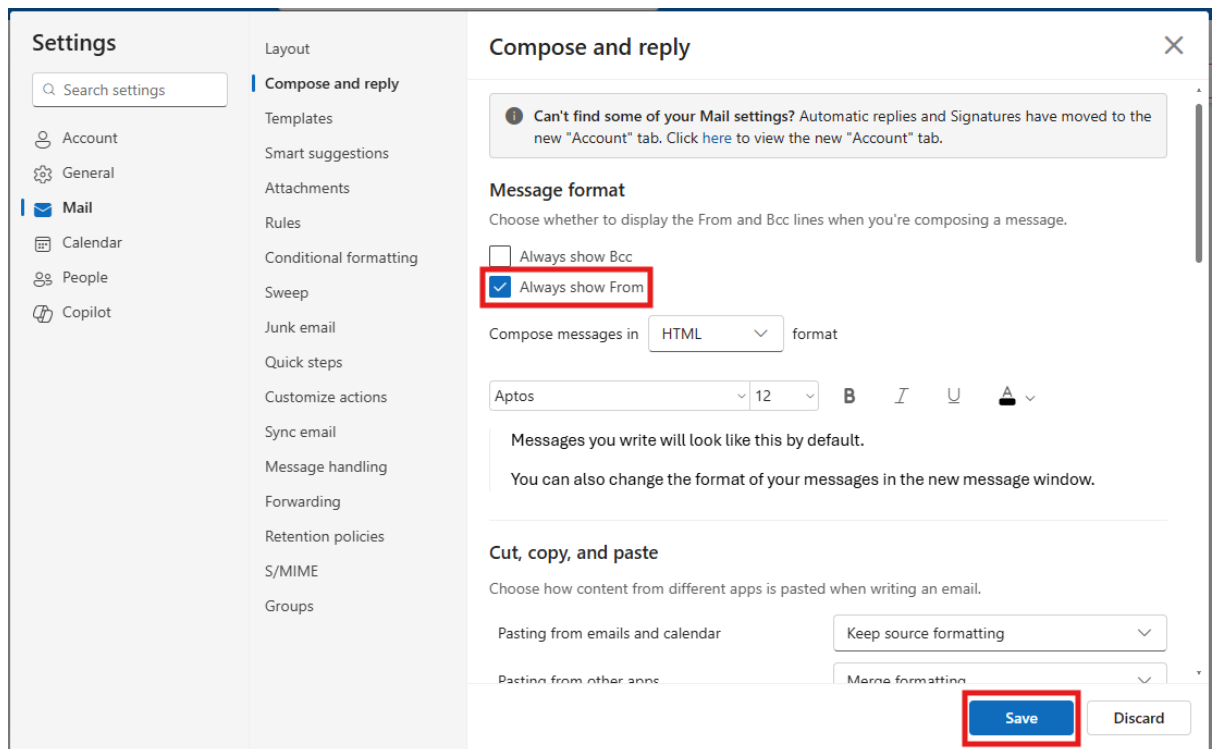

1. On the top right of Outlook, select the gear icon.

2. Click on “Compose and reply”.

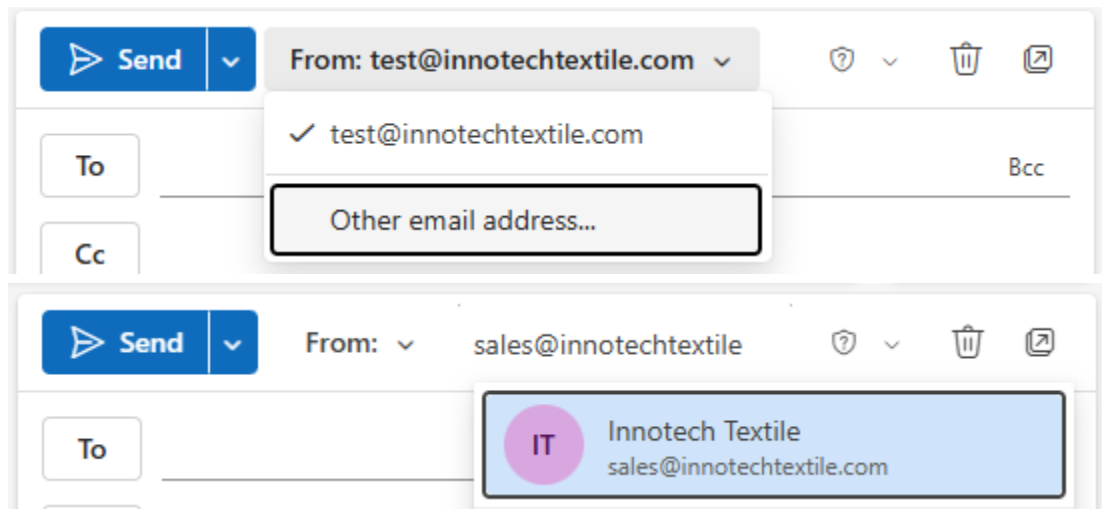

3. Ensure that “Always show From” is checked, and click “Save”.

4. Close the Settings pop-up.
5. When you compose a new email or reply to an email, there is now an option to select an email address or alias you want to send as.

6. If you do not see the email alias you want to send as from the drop-down, select “Other email address”, and enter the email address (example: sales@innotechtextile.com). You should now be able to send an email using the alias.

Please always ensure that you are using the correct email address or alias when sending an email.
